

The Reign *Optimus* Automatic Timepiece

(RN3801 – RN3806)

Mechanical automatic watches harness the kinetic energy contained within the natural movement of your arm to generate the force required to operate. The watch will commence operation after a sufficient volume of initial power has been generated by handling / wearing or by manually winding the crown. Supplemental winding through wear or manual winding will ensure sustained functionality and increase the duration in which the watch will continue to operate when unworn.

Setting Instructions

- 1) Pull the crown to its most outward position.
- 2) Rotate the crown clockwise until the current time is displayed.
- 3) Push the crown in to its rest / manual winding position.
- 4) Manually wind the movement by rotating the crown clockwise 10-20 times.

Note: Although manual winding is not necessary, generating an initial power reserve and occasionally winding the movement manually will increase the duration in which the movement continues to operate when the watch is not worn.

Water Resistance Guidelines

Rating	Submersible	Capacity of Resistance
No Marking	No	Splash/light contact only.
5ATM	No	Hand/dish washing.
10ATM	Yes	Low depth and short duration only.
20ATM	Yes	Short duration diving up to 5 meters.
25ATM+	Yes	Average depth and duration diving.

Note: Manipulation of the crown while in contact with water will negate the rated water resistance as water penetration may occur.
