

The Shield *Cousteau* Timepiece

(SH0801 - SH0809)

Setting Instructions

- 1) Unscrew the crown by rotating it counterclockwise until it is free from the case threads.
- 2) Pull the crown out two clicks.
- 3) Set the current time by rotating the crown counterclockwise;
 - for AM hours **do not** advance the hour hand past the 12 o'clock position,
 - for PM hours advance the hour hand past the 12 o'clock position **once**.
- 4) Push the crown in one click.
- 5) Set the current date by rotating the crown clockwise until the correct value is displayed.
- 6) Push the crown in one click to commence timekeeping.
- 7) Secure the crown; pressing in on the crown to overcome the spring resistance, rotate clockwise to start the threads, then continue screwing the crown down until it is secured to the case. **Finger-tighten only.**

Note: Setting the time to AM / PM accordingly ensures that the date indicator changes at midnight rather than noon. If the date indicator is changing in the afternoon, advance the hour hand one full rotation (12 hours), then reset the date indicator as necessary.

Water Resistance Guidelines

50 ATM – Diving and water sport approved. **Note:** manipulation of the crown while in contact with water will negate the rated water resistance as water penetration may occur.
