How to Set a Breed Bravo Watch

1) Pull the crown to its most outward position.

2) Set the watch to AM time by rotating the crown counterclockwise till the date indicator changes. *****

3) Set the current time by rotating the crown counterclockwise. For AM, do not advance the hour hand past the 12 o'clock position - for PM, advance the hour hand past the 12 o'clock position once.

4) Push the crown in to its middle position.

5) Set the current date by rotating the crown clockwise until the date indicator displays the correct value.

6) Return the crown to its most inward position.

* Setting the time to AM / PM accordingly ensures that any equipped incremental indicators change at midnight. If any secondary indicators are changing at noon, please follow this procedure to ensure proper synchronization: pull the crown to its most outward position, advance the hour hand one full rotation (12 hours), and reset indicator(s) to their proper value as necessary.
