

The MOS *Caracas* Timepiece

(CS101 – CS108)

Setting Instructions:

- 1) Relocate the crown protector by pivoting it upwards.
- 2) Pull the crown out two clicks to its outermost position.
- 3) Rotate the crown counterclockwise until the date indicator advances one position.
- 4) Set the current time as follows:
 - for AM hours advance the hands directly to the current time,
 - for PM hours advance the hour hand one full rotation (12 hours) *once*, prior to setting the time.
- 5) Push the crown in one click to its middle position.
- 6) Set the current date by rotating the crown clockwise until the correct value is displayed.
- 7) Push the crown in to its innermost rest position to commence timekeeping.
- 8) Reposition and secure the crown protector.

Note: Setting the time to AM / PM accordingly ensures that the date indicator changes at midnight rather than noon. If the date indicator is changing in the afternoon advance the hour hand one full rotation (12 hours), then reset the date indicator hour hand as necessary.

Water Resistance Guidelines:

10 ATM - short duration and low depth resistance only. Not suitable for extended swimming periods or bathing. Not suitable for diving. **Note:** Manipulation of the crown while the watch is in contact with water will negate the rated water resistance as water penetration may occur.
