

# The Breed *Vin* Timepiece

(BRD9001 – BRD9004)

## Setting Instructions

### Main Dial

- 1) Pull the crown out two clicks to the time setting position.
- 2) Rotate the crown clockwise until the date indicator advances one position.
- 3) Set the current time as follows:
  - for AM hours advance the hands directly to the current time,
  - for PM hours advance the hour hand one full rotation (12 hours) *once*, prior to setting the time.
- 4) Push the crown in one click to the middle position.
- 5) Set the current date by rotating the crown clockwise until the correct value is displayed.
- 6) Push the crown in one click to the innermost position to commence timekeeping.

### Sub Dial

- 1) Ensure the crown is in the innermost position.
- 2) Unlock the hands by pressing and holding the button below the crown until the minute hand advances one increment, then release the button.
- 3) Set the sub dial to reflect the desired time / Timezone;
  - pressing the button once advances the time minute by minute,
  - pressing and holding the button advances the time at an accelerated rate.
- 4) After setting, the sub dial hands will lock in approximately 15 seconds.

**Note:** Setting the time to AM / PM accordingly ensures that the date indicator is changing at midnight rather than noon. If the date indicator is changing in the afternoon, advance the hour hand one full rotation (12 hours), then adjust the date indicator as necessary.

## Water Resistance Guidelines

**5 ATM** – light contact and short duration resistance only. Not suitable for bathing, swimming, diving, or extended periods of contact. **Note:** manipulation of the crown or button while the watch is in contact with water will negate the rated water resistance as water penetration may occur.
